

BRIAN VARGAS

JAVA BACKEND DEVELOPER

I'm a software developer with 3+ years building applications, focused on Java and Spring Boot on the backend and full stack capable with Angular and TypeScript.

I design REST APIs, model relational databases and deploy with Docker. My profile is hybrid: I bring Cisco Networking Academy coursework (CCNA track) and CCST cybersecurity certification alongside cloud (Google Cloud).

Native Spanish · English B2

EXPERIENCE & PROJECTS

► Founder & Backend Developer — Software Development Club

2025 — Present

K-Forge · Fundación Universitaria Konrad Lorenz

University software development club I founded and lead: I coordinate the technical team, planning and architecture guidelines. Since 02/2026 I have been building its institutional website, now in production.

Stack: Angular · TypeScript · Tailwind CSS · GitHub API · Vercel

► KApp — University mobile application

04/2025 — Present

K-Forge · Konrad Lorenz University Foundation

Mobile application for the university community, and my thesis project. I lead requirements and architecture: six microservices in Java 21 and Spring Boot behind an API Gateway centralizing routing and JWT validation, with Eureka discovery, OpenFeign inter-service calls, Resilience4j circuit breakers and PostgreSQL. Runs on Docker Compose with CI on JDK 21, in the thesis pre-proposal phase. Kotlin and Swift clients are the next stage.

Stack: Java 21 · Spring Boot · Spring Cloud · Eureka · OpenFeign · Resilience4j · PostgreSQL · Docker · Maven · GitHub Actions

► AMODEL — Differential equations lab

02/2026 — 05/2026

Academic project · Konrad Lorenz University Foundation

Reproducible Python pipeline that calibrates a logistic ODE with harvesting from 27648 measurements parsed out of a Minecraft server instrumented as an ecology lab. The experiment falsified the model: a Holling Type II response cuts the error by 81–91% in the supercritical regime.

Stack: Python · SciPy · NumPy · pandas · Matplotlib · pytest

► Teaching Assistant — three subjects

07/2024 — 06/2025

Konrad Lorenz University Foundation · Part-time

Selected on academic merit for three consecutive assistantships: Linear Algebra, Programming Techniques I and Programming Techniques II. I ran support sessions on object-oriented programming with Java, algorithmic optimization and debugging, and reviewed student code with a focus on clean-code practice.

Professional Portfolio

06/2025

Personal project · Deployed on Vercel

Personal site where I publish my projects, in four languages (ES / EN / FR / PT). Built with Astro and Tailwind CSS, optimized for fast loading and deployed with continuous integration.

Stack: Astro · TypeScript · Tailwind CSS · Vercel

SpemTraductor — Translation tool

09/2024 — 02/2025

Personal project · Deployed on Vercel

Web translator for “SpemCode”, a 30-symbol substitution cipher used by the Spem Clan of Scout Group 74. Real-time bidirectional transformation with no dependencies and no build step: what ships is the source.

Stack: JavaScript · HTML · CSS · Vercel

Systems Engineering

2023 — 2027

Konrad Lorenz University Foundation · Bogotá D.C, Colombia

I train across the Software Development Life Cycle (SDLC), scalable solution architecture, databases, and network and infrastructure administration.

CCST Cybersecurity — Cisco Certified Support Technician

05/2026

Cisco Systems · Official proctored exam (Certiport) · Valid through 05/2031 · [Verify badge](#)

I passed the official 100-160 exam with 974/1000 (700 minimum): 100% in network security, vulnerability assessment and incident handling.

Cisco Networking Academy — 4 courses

09/2024 — 05/2026

Cisco · 4 digital badges and 4 certificates · [Badges on Credly](#)

Ethical Hacker (05/2026): vulnerability recognition, penetration testing and security reporting. **CCNA: Switching, Routing & Wireless Essentials** (11/2025): integrating software with secure network infrastructure. **Introduction to Cybersecurity** (02/2026) and **NDG Linux Unhatched** (09/2024).

Platzi — Java & Spring

02/2026

Platzi · 2 certificates · 32 hours of theory and practice

Java Spring and **Java Spring Data JPA: Databases**: direct reinforcement of my core stack in dependency injection, persistence layer and object-relational mapping.

Google Cloud — 16 courses and digital badges

02/2026 — 05/2026

Google Cloud Skills Boost · [Public profile](#)

Generative AI (6): concepts, ecosystem, agents and apps. **Data & analytics (5)**: data engineering, data lakes, warehouses, batch pipelines and ML. **Infrastructure & operations (5)**: core infrastructure, scaling, security and modernization.

COURSES & TRAINING

continued...► **Interamerican Leadership Training**

12/2023 — 01/2024

World Organization of the Scout Movement · Santo Domingo, Dominican Republic
International training in advanced leadership, assertive communication and social-impact project management.

► **Web Programming**

04/2023 — 05/2023

Oracle Next Education (ONE)
Programming and logic fundamentals with a focus on JavaScript and web development. This is where my path began.

RECOGNITIONS

► **Cisco Cyber Challenge**

04/2026

Cisco Systems · Bogotá D.C, Colombia
Regional cybersecurity competition with a learning-first focus, held at Cisco Systems' Bogotá offices. I earned the voucher with which I sat and passed the CCST Cybersecurity exam.

► **Honorable Mention**

02/2024

Konrad Lorenz University Foundation
I received it for completing the full semester course load with a minimum 43/50 average, without failing any subject and with no disciplinary sanctions.

► **University Representative — National Programming Marathon**

2024

Konrad Lorenz University Foundation
I was part of the student delegation that represented the university at the national contest, against ~120 teams, the qualifier for the Latin American Regional. I solved algorithmic problems in Java, Python and C++.

► **BP (Baden-Powell) & Daniel Isaza Isaza Decorations**

2023

Scouts of Colombia
I received the Scout Movement's highest youth recognition (BP) for exceptional leadership and commitment, and the Daniel Isaza Isaza decoration for my distinguished service in the movement's development in Colombia.

SKILLS

Leadership & team management

I guide teams toward common goals and keep them motivated.

Proactivity

I seek improvements in performance, scalability and architecture.

Problem solving

I identify, analyze and resolve technical problems with judgement.

Responsibility & integrity

Reliable with critical infrastructure; I uphold quality and ethics.

Effective communication

I present technical ideas clearly and document APIs and systems.

Continuous learning

I pick up new technologies and apply them to real projects.
